

Tablecloth weight

Summer is at its most beautiful: the roses are blooming, and it smells of jasmine. And unlike in other years, it rains just regularly, which makes the garden literally explode. We eat as often as possible in the garden. And who doesn't know it: you have just put a tablecloth on the table, and you want to get something else, it is already pushed down again. I've always wanted to buy weights, but I've never found any of them that I've found beautiful. Now I have made them myself and written down the instructions for you.
